# Architectural Facades

Customers involved with the design of aluminium flashings and presswork for modern architectural facades demand from their coater the highest attention to finish quality and flexibility. In today's market, applicators must be adept at handling small volumes and large quantities with equal efficiency. For larger set-piece projects, e.g. for shopping centres, stadia or airports, customers need an applicator who will feed seamlessly into their supply chain.

Sprint Coatings Ltd., formerly Goodbody Colour Coating Ltd. and Coating & Fabrications Ltd., has built up many years experience working with such customers. Our new facility is designed to better meet their needs, and to surpass anything our competitors can offer.

## **Aluminium Finishing**

Our new facility allows us to pretreat and powder coat larger and more complex sizes than before. A variety no other applicators can match.

## **Steel Finishing**

For architectural flashings and presswork made from steel we have developed an exciting new initiative. We have recently established an association with Silverwood Enterprises Ltd., one of Ireland's leading Galvanisers. With this association, we can now offer galvanising only.

### **New Services**

- Poly-coating pressings after painting.
- Introduction of new collection and delivery services.
- Free technical support on any coating matters.
- Organising remedial or repair work for any site damage.
- New Galvanising service for steel items.

### **Sprint Quality**

- The only applicator in Ireland to be approved by the 4 major architectural powder manufacturers; Syntha Pulvin (Valspar), Interpon (Akzo Nobel), Alesta (Dupont) and Jotun architectural powders.
- Sprint Coatings operates to ISO9001:2008, an established quality management system
- For powder coating over aluminium, the company operates to the prestigious standard QUALICOAT. This powder coating Standard is unique. It is the only one where unannounced inspections are carried out by an independent testing house, Bodycote PLC.
- Guarantees up to 25 years available.
- Galvanising at Sprint is provided to BS EN ISO 1461:1999

### **Sprint Logistics**

- Based near Dublin Airport, in North West Business Park (Phase 3) Sprint Coatings Ltd. is close to all major arterial routes, M50, N1 – N9, around Dublin.
- We hold the largest variety of powders in Ireland. Any powder stock item not held in the company can be obtained within 24 hours.
- A guaranteed 24hr Fast-track service is available - Usual turnaround is 3 days.
- We can chemically pretreat and powder coat items as long as 7.8m as high as 2.5m and as wide as 600mm.
- Galvanising is now available (Galv bath size 12.4m long X 2.75m deep X 1.83m wide). A 3 day turnaround is guaranteed.
- Shot-blasting service – producing blast cleaning to SA2½ - (Items up to 9m x 3m x 2m)

## The Company

---

Sprint has been formed by the merging of 2 of Ireland's most established powder coating applicators, namely, Goodbody Colour Coating Ltd which specialised in coating aluminium; and Coating & Fabrications Ltd, which specialised in coating galvanised steel. In addition, Sprint Coatings has formed an association with Silverwood Enterprises Ltd. to be able to offer our customers an option for galvanising. With these initiatives we have truly created Ireland's most versatile coating application service.

This creates a combined coatings experience over 50 years. Building on this experience Sprint Coatings Ltd is all about making coatings more convenient for our customers.

"We will give our customers the right quality they want, when they want it, where they want it, whether for one item or 1,000 items."
